

Sales Invoices at your Fingertips

Proving your customers have received the goods and services you delivered is simple when using SearchExpress/POD Document Imaging. With a click of your mouse, you can view, email, or print the signed proof-of-delivery (POD) document proving receipt of goods.

Also, you could let your customers search and view their own POD's, over the Internet.

SearchExpress/POD Document Imaging provides browser-based searching of scanned proof-of-delivery documents, with no manual data entry. No more sifting through filing cabinets and drawers of paper to find what you are looking for.

Here's One Way SearchExpress/POD Document Imaging Can Work:

When you first print your delivery documents, you can print a barcode on each document. The barcode contains the invoice number or other unique identifier. Or, instead of using barcodes, you can let SearchExpress OCR (Optical Character Recognition) the invoice.

Your customers sign the delivery documents, as proof of delivery of your goods or services.

Your Accounts Receivable or Transportation department receives the proof-of-delivery (POD) documents.

You use SearchExpress to scan the delivery documents.

SearchExpress/POD Document Imaging uses the barcoded invoice number to get the customer name and number, invoice number and date, and other invoice information from your Accounts Receivable invoicing system. Or, you can let SearchExpress OCR the proof-of-delivery invoices.

To search for delivery documents, you use your browser and type in the customer name or number, invoice number or date, or other invoice information.

Document Imaging is now very affordable!

Sales Invoices at your Fingertips

SearchExpress/POD provides new opportunities for improved customer service and reduced costs.

Executive Technologies, Inc. has been developing the SearchExpress family of affordable high-performance document capture and search products since 1984, and can use this experience to help put your documents at your fingertips.

Document imaging is now very affordable. You can store twenty million scanned pages on a \$250 one terabyte hard drive. That's 8,000 pages a day for ten years.

Good scanners are now also affordable. You can get a 25 page-per-minute (PPM) scanner for less than \$1,000, and a 60 PPM scanner for less than \$2,000.

SearchExpress is so easy to install and use that most of our clients do not need any on-site installation and training. However, we would be pleased to provide on-site training and consulting, if requested.

We guarantee your satisfaction. We always offer SearchExpress Document Imaging software with a 30 day money-back guarantee.
