

### Scanning and Hosting Service

Secure your financial independence by owning a profitable SearchExpress franchise!

Earn money by scanning and hosting documents for companies overflowing with paper.

As a SearchExpress franchisee, you would use SearchExpress Document Imaging ® software for scanning, OCR, and indexing of your client's documents.

**You can deliver the scanned documents to your clients on CD or over the Internet. You can also provide the SearchExpress search engine to your clients, so they can search their scanned images.**

In addition to the usual per-page scanning fee, you could also earn a per-month hosting fee, by hosting documents for your clients and letting them search their documents over the Internet.

You could also host their workflow, so they could route and approve documents over the Internet.

Executive Technologies, Inc. has been developing the SearchExpress family of affordable high-performance document capture and search products since 1984, and can use this experience to help you grow a profitable scanning and hosting business.

Document imaging is now very affordable. You can store twenty million scanned pages on a \$250 one terabyte (trillion byte) hard drive. That's 8,000 pages a day for ten years!

Good scanners are now also affordable. You can get a 60 page-per-minute (PPM) scanner for less than \$2,000. SearchExpress also supports high-end scanners that scan over 120 pages per minute.
